

What's currently happening at the Clubhouse!!! It's been a day-to-day adventure, but exciting!!

The demolition has been completed and now it's time to work on putting things back in place. The painting has been completed, and the new color has given the Clubhouse a completely new look. Tile project continues, the front entrance is completed with a new colorful tile center and now it's time to work on the bathrooms. Carpeting will be next on the agenda and soon will start being installed throughout the Clubhouse. The new chandelier and other lighting will be next, then the quartz countertops and of course the completely new look in the bathrooms with extensive upgrades. Still to come, new furniture, and art coverings. Many photos are being taken from day-to-day projects so everyone can see how the Clubhouse is coming back to life.

We truly understand how difficult it has been for you full-time residents not having access to the Clubhouse. We all are missing the day-to-day conversations with all of you and all the activities that once filled the Clubhouse. We deeply appreciate all of you being patient until the doors open once again for all those fun activities.

The good news is that the renovation project is on track. Completion is still set for middle to end of August. So please be patient as it's going to be so worth the wait. In addition to the Clubhouse other projects are taking place. The phones and the internet were provided by Cox. Wyyerd approached us about having a site evaluation done and now the office phones are through Wyyerd. Wyyerd company, however, doesn't offer elevator phone service we are reaching out to a company called Kings 3 for our elevator phone to go wireless. Cox is still maintaining the phone in all the elevators.

Oh yes, and the new fountain area between building 6 & 7 new benches have been ordered. This area has such a calming effect we thought additional benches would bring more people to sit and enjoy the soft relaxing sound of the fountains and the outdoors.

There have been several landscaping proposals approved that won't start until the first week of October, it's way too hot now for those projects to be done.

The Palm Trees have been trimmed around the entire community and it's looking great! The pool goers are happy not having all the flowers from the palms in the water. Unfortunately, another tree by building 4 had to be removed due to a large split and could not be saved.
